

Boosters Are For Big Kids

Did you know most kids need to ride in a booster seat from about age 4 until at least age 8?

If your child isn't using a booster, try this simple test the next time you ride together in the car.

The 5-Step Test

- 1. Does the child sit all the way back against the auto seat?**
- 2. Do the child's knees bend comfortably at the edge of the auto seat?**
- 3. Does the belt cross the shoulder between the neck and arm?**
- 4. Is the lap belt as low as possible, touching the thighs?**
- 5. Can the child stay seated like this for the whole trip?**

If you answered "no" to any of these questions, your child needs a booster seat to ride safely in the car. Kids like boosters because they are more comfortable, too!
