

STARLINK ACCESSORIES

Not your Starlink? [Click here](#)

The mount that comes with your Starlink is designed to support a ground level installation or a quick setup to test your internet connection.

Mounts and cable routing accessories are designed for permanent installation in an elevated location, like a roof, pole, or wall.

The router that comes with your Starlink is designed to provide WiFi within your home. The Starlink Ethernet Adapter is required for a wired connection.

To learn more about where to install your Starlink and how to avoid obstructions, [click here](#).
